

Education

IIT Bombay <i>M.Tech in Industrial Engineering and Operations Research (IEOR)</i>	Jul 2024 – Jul 2026
Guru Ghasidas University <i>B.Tech in Computer Science and Engineering (CSE)</i>	Jul 2020 – Jul 2024

Experience

Full-Stack Developer Intern <i>Jumps Automation Powai, Maharashtra</i>	May 2026 – Present
- Developed CyberAegis, a gamified cybersecurity training platform with 7 microservices and 41 interactive simulators - Engineered 128+ REST API endpoints serving a React 18 SPA with event-driven architecture using RabbitMQ and Redis - Deployed 9 containerized services on Kubernetes; wrote 261+ integration tests validated for 5,000 concurrent users	
Full-Stack Developer Intern <i>Vajra Labs, IIT Bombay Powai, Maharashtra</i>	Aug 2025 – Dec 2025
- Built a malware analysis platform processing 200+ daily submissions with static, dynamic, and memory analysis reports - Engineered sandboxed multi-VM execution with an asynchronous Celery pipeline for high-throughput concurrent analysis - Developed using Python, Django/DRF, and Next.js/TypeScript with JWT auth, TOTP 2FA, CAPTCHA, and rate limiting - Led a 3-member team using Agile sprints, delivering across 2 concurrent projects including the company website frontend	
Full-Stack Developer Intern <i>Presear Software Pvt. Ltd. Bilaspur, Chhattisgarh</i>	May 2023 – Jul 2023
- Developed a full-stack web application using React.js and Django REST Framework with component-based architecture - Shipped production-ready features directly from client requirements as 2-member team lead with iterative release cycles	
Full Stack Intern <i>Dimensionless Technologies Navi Mumbai, Maharashtra</i>	Nov 2021 – Jan 2022
- Built an image-processing pipeline using Node.js, OpenCV.js, and Google Vision API to identify medicines from batch photos - Auto-populated an Excel-compatible inventory system, cutting manual medicine cataloging from hours to minutes per batch	

Technical Skills

Languages (Proficient): C, Python, C++, JavaScript, TypeScript, SQL (Familiar): Go, Rust, Java, Bash, Lua Frameworks & Libraries: Django, DRF, FastAPI, React.js, Next.js, Node.js, Tailwind CSS, HuggingFace Transformers, PyTorch Systems & Tools: PostgreSQL, Redis, Docker, Kubernetes, Git, GitHub Actions, nginx, RabbitMQ, Celery, WebSockets, Linux

Projects

The Third Eye: Vintel Platform <i>Polyglot Microservice Cybersecurity News System</i>	Jan 2026 – May 2026
- Architected a polyglot microservice system using Go, TypeScript, Rust, and React with persistent memory and A2A protocol - Designed a multi-agent LLM pipeline with two-round editorial deliberation and Borda-count cross-story ranking algorithm	
VersatAI Lab Website <i>Full-Stack Content Management Platform</i>	Dec 2025 – Present
- Developed a full-stack platform for managing research activities, student profiles, projects, and events with RBAC - Built secure REST APIs with Django/DRF and an SSR/SSG frontend with Next.js; deployed with Docker Compose - Implemented JWT-based authentication, TOTP-based 2FA, equation-based CAPTCHA, and role-based access control	
HeadBall2 Game Player <i>Real-Time Mobile Game Automation with Computer Vision and RL</i>	Feb 2025 – Mar 2025
- Built a real-time computer vision pipeline processing live mobile game video at 30 FPS using OpenCV and Python - Engineered a WebSocket client-server architecture achieving 50ms end-to-end latency for reinforcement learning game control	

Research

Parameter Specific Literature Retrieval <i>Master's Thesis Advisor: Prof. Balamurugan Palaniappan</i>	Jul 2025 – Nov 2025
- Built a biomedical literature retrieval pipeline over 87K+ PubMed abstracts to extract parameter-specific clinical evidence - Achieved entity extraction F1-score of 90% by fine-tuning a PubMedBERT-based NER model on annotated dataset - Deployed a distributed ML pipeline with Ray, PyTorch, and HuggingFace Transformers on a Next.js/FastAPI stack - Built a provenance-tracked Neo4j knowledge graph and QA engine reaching an 88% answer rate with every claim cited	

Leadership

Teaching Assistant <i>IE 201, AI & ML Lab, IIT Bombay</i>	Jan 2026 – Apr 2026
Designed lab experiments, set and graded exams for 40 B.Tech students, and conducted doubt sessions on AI/ML concepts	
Teaching Assistant <i>IE 643, Deep Learning – Theory and Practice</i>	Jul 2025 – Nov 2025
Led weekly programming sessions for 80+ students; managed grading, project planning, and regular doubt sessions	
Website Coordinator <i>IEOR Day, IIT Bombay</i>	Jan 2025 – Mar 2025
Coordinated the annual IEOR Day with a team of 30+ members; developed and maintained the event's official website	
Technical Team Lead <i>GeeksforGeeks Students Chapter, GGV</i>	Aug 2022 – May 2023
Led the technical team of the campus chapter, organizing coding contests and DSA sessions for undergraduate students	

Achievements

Published research paper on Plant Disease Classification using Deep Learning in International Journal of Computing - Achieved 99.30 percentile (2024) and 99.13 percentile (2023) in GATE CSE among 200,000+ candidates - Secured World Rank 32 in CodeChef Starters 42 competitive programming contest (Data Structures and Algorithms) - Secured Rank 1 in HackForCG Hackathon by developing an ML-based computer vision solution using OpenCV and Haar Cascade
